

Poetry.

Sonnet.

BY JOHN A. SYMONDS.

Oh, sweet and strange what time gay morn-
ing dawns
Over the misty plain, and gently stir
The laden leaves and pebbles on the shore,
To break the dew-drenched grass and moss,
From meadow grass and beneath black
firs,
In hushed streamlets, or translucent lakes
To bathes amid dim heron-haunted brakes!
Oh, sweet and sumptuous at height of noon,
Languid lie on scented summer lawns,
Fanned by faint breezes of the breathless
June;
To watch the timorous and trooping fawns,
Dappled like tenderest clouds in early
dawns,
Forth from their ferny covert glide to drink
And cool the limbs beside the river's brink!
Oh, strange and sad are daylight disappear-
ances,
To hear the creaking of the homeward
wain,
Drawn by its yoke of tardy-pacing steers,
"Nearer honyuckle hedge and tangle lane,
To breathe faint scent of roses on the wane
By cottage doors, and watch the mellowing
sky
Fade into soft hues incessantly.

The Sea.

She was rich and of high degree,
A poor and unknown artist, he,
"Paint me," she said, "a view of the sea."
So he painted the sea as it looked the day
That Aphrodite arose from its spray;
And it broke, as she gazed on its face the
while,
Into its countless, dimpled smile
"What a pretty, stupid picture!" said she;
"I don't believe he can paint the sea."
Then he painted a raging, towering sea,
Stomping, with waves and maddening shock,
Wild cries, and writhing tongues of foam,
A towering, mighty fastness took.
In its side, above those leaping crests,
The thronging sea-birds built their nests.
"What a disagreeable daisy!" said she.
"Why, it isn't anything like the sea!"
Then he painted a stretch of lot, brown sand,
With a big hotel on either hand,
And a handsome pavilion for the band—
Not a sign of water to be seen,
Except one little faint streak of green.
"What a perfectly exquisite picture!" said
she,
"It's the very image of the sea."

The Rosebud.

BY MORTIMER COLLINS.

O touch that rosebud! it will bloom
My lady fair!
A passionate red in dim green gloom,
A joy, a splendor, a perfume,
That sleeps in air;
You touched my heart; it gave a thrill
Just like a rose,
That opens at a lady's will;
Its bloom is always yours until
You bid it close.

Selected Tale.

SKETCHES OF ARMY LIFE.
"FIVE FORKS."

It is four o'clock in the afternoon of March 31st, 1865. The battle of Gravelly Run has been fought and won; but a fearful conflict is raging elsewhere. Away beyond us, far down on our extreme left, we can hear the roar of the battle, the booming of cannon, and the heavy crash of musketry. We have no infantry at that point. It must be Sheridan and his cavalry coping with the enemy down near the South Side railroad. How intently we listened! The battle ideas were receding, and it was evident that Sheridan's force was being borne back by the enemy. General Warren, commanding our corps, became nervous and restless. His mission is to support Sheridan's movement. He has already led his troops through many obstacles and is now awaiting further orders. His black eyes flash forth the intensity of his thought. His classic features become pale as he listens to the sounds of battle growing each moment more indistinct. At last he exclaims, "I can endure this no longer, and without orders I will endeavor to send aid to Sheridan. Bartlett's old brigade must endeavor to make its way to Sheridan's relief." A staff officer dashed away to Bartlett and soon our lines were formed, and we marched in the direction of the distant battle. The narrow road along which we marched was lined on either hand with a dense growth of pine trees. The sun was sinking from view. The tall trees cast our lengthening shadows across our pathway. It was to us of thrilling interest. We all understood the situation. Our brigade was detached from the army, and was marching through that great forest to meet an enemy of whose strength and location we knew nothing. The sounds of battle in our front died away. The darkness became so intense that it was not prudent to proceed further, especially as nothing was to be gained by such a course. The pickets were sent out and we laid down to sleep and rest. At midnight we were aroused by the information that our pickets had discovered the enemy was in great force in our immediate front, so near that they could easily listen to the conversation of their pickets, and also of the soldiers behind their breastworks. Silently we fell into line, and retracing our steps along the way we came for several miles, encamped for the remainder of the night.

The morning of April 1st was clear, but cold and frosty. We were early on the march, moving to the left of the point from which we had fallen back the previous night. The whole corps had arrived. We were moving in a direction that would bring us to a place known as Five Forks, near which Sheridan had fought the day before. About ten o'clock in the forenoon we halted in the edge of an oak

wood, and there remained until two o'clock in the afternoon. The South Side railroad was of great importance to General Lee, because over that road he brought all the provisions for his army in Richmond and Petersburg. It was the life-line that connected the confederacy and its capital. If that line of connection was cut, Richmond must be abandoned. To guard this road General Lee had sent a large force of troops, who had constructed a long line of breastworks running parallel with the road, for its defense. The centre of this line of defenses was at a point known as Five Forks, so named from the five roads that centered there. Sheridan had advanced upon these works on the 31st, but not being supported by infantry, had been crowded back for several miles. But General Warren had now arrived, and Sheridan's plan was to advance with his cavalry in front of the works, and while thus attracting the enemy's attention have the Fifth corps advance in their rear and take them by surprise. At two o'clock our corps were formed for the advance in two lines of battle, our regiment being in the second line. We were to advance over a rough, broken country, filled with ravines and covered with a thick growth of forest trees. We marched some two or three miles, and the lines were so changed while we were marching that we soon found we were in the front line. Our regiment and the 1st Michigan were under the command of Colonel Walter G. Morrill, and in all our previous experience we had never been led by a braver or more skillful commander. We climbed a hill, and looking down through the trees, saw the breastworks but a short distance in our front. We had advanced so quietly that the enemy was not aware of our presence. Our lines were reformed, and then with a yell we charged. Before the enemy had time to recover from their surprise we were upon them. They throw down their guns without firing a shot, and surrendered. The number of prisoners embarrassed us. We sent them to the rear as fast as we could, but they must have had ten men to our one. They soon discovered the superiority of their numbers, and the mistake they had made in surrendering. A large portion of our men had gone to the rear with prisoners. A rebel officer came dashing down the line, calling upon them to rally. A rebel who had surrendered was standing near Colonel Morrill, and catching up from the ground a loaded rifle yelled with an oath, "We can whip you yet," and deliberately shot a captain of the 1st Michigan regiment who stood beside him. At the same moment a private of Company "C" in our regiment, thrust his bayonet through the breast of the treacherous rebel, who fell dead at his feet. In a moment's time the battle was raging all along our line. It was hot work; in many places it was a hand to hand fight. Men deliberately pointed their rifles in each other's faces and fired. Clubbed muskets came crashing down in deadly force upon human skulls. Men were bayoneted in cold blood. Feats of individual bravery were performed on that afternoon, which, if recorded, would fill a volume. I can only refer to a portion of them. On the right of Company H were four men. One of them was Morrill, whose name I have mentioned before. A man of gigantic strength and remarkable bravery. One other of the four was named Gilmore. He was equal to Morrill in bravery, and nearly his match in physical strength. The third was named Hickey, a man of Scotch-Irish descent, who had served in the regular army of England, and who had deserted and come to our country and enlisted in our regiment. He was tall and robust, a perfect mass of bone and muscle. The fourth was younger in years and more slender in form than his companions. When we reached the rebel breastworks they threw down their arms and surrendered. They were densely packed in our front, as men gather in a crowd upon a public square. Some ten rods from the breastworks upon which we stood we saw a rebel flag leaning against a tree. To reach it we would have to pass through this great crowd of men. Morrill saw the flag, and waving his hat called, "Come on, boys, and we will capture the flag!" and suiting his action to his words he sprang over among the rebels and was quickly followed by the three men above described. There was evidently no danger, as the rebels were not disposed to fight, and the four men easily made their way through the crowd that opened to receive them; until they had passed over one-half the distance between the breastworks and the flag. At least four hundred rebels were packed between them and their comrades. It was at this moment that the enemy rallied, and these four men found themselves surrounded on every hand, cut off from their comrades, and all hopes of escape destroyed. But Morrill cried: "We will fight our way back to the regiment!" They turned to obey his command. A rebel officer sprang at Morrill's throat and called upon him to surrender. The brave soldier brought the heavy stock of his rifle down with such crushing force upon the officer's head that he fell dead at his feet. It was now a desperate fight. They were in such close quarters that neither party could very well shoot. On one side it was half a hundred men striking and surging back and forth, thinking only of

venge and victory; on the other, the four men, single handed, pounding their way through all opposition. The combat was as unequal as it was desperate. The most fearful blows were given and returned, but the four men standing side by side managed to stand upon their feet, slowly advancing as they fought, until bleeding, bruised, and stunned, they sprang from the rebel crowd and reached an open space between their comrades and the rebels. At that moment the baffled enemy poured a deadly volley upon the escaping soldiers. Morrill sprang high in the air and fell with a deadly groan. Gilmore sank upon the ground in a lifeless condition. Hickey reeled and staggered, while the other received a rifle ball in the left arm, but succeeded in reaching the breastworks and rejoined the regiment.

It was the supreme moment of the conflict. The rebels would climb upon one side of the breastworks and our men on the other side would knock them back. We heard bugles in our front, and out from a piece of woods some eighty rods away came dashing squadrons of cavalry. With a cheer our men sprang over the works and upon the rebels. They reeled and staggered before us. Colonel Morrill was in the thickest of the fight. Captain Fernald dashed among the enemy and captured a flag. Bigford, Folger, and a score of other officers in our regiment led their men. It was becoming too hot for the Johnnies and they turned to run. It was too late, Sheridan threw his lines around them like a girdle of death and five thousand prisoners were captured. While our regiment was thus engaged, General Ayers with the first division and General Chamberlain with a brigade of our division was fighting on our left, and when the rebels broke before our advance, their whole line was in our possession and we were upon our right. We all rushed with wild enthusiasm in that direction. Sheridan went dashing past us wild with the excitement of victory, shouting as he swung his clenched hand through the air—"Smash 'em! Smash 'em! We have a record to make before the sun goes down. We must have the South Side road." An open field was in front of the last position the rebels held. General Warren caught the corps flag from the hand of the man who carried it, and dashed across the field leading on a column of soldiers he had hastily formed for the charge. It was the most gallant deed of the whole day's battle, and the whole rebel line was now in our possession.

The sun was low in the western sky, but there was no rest. Sheridan, like a madman, dashed here and there urging on his men. The cavalry followed the retreating foe, capturing prisoners by hundreds. The infantry pressed on after them, and we soon reached the desired point. The South Side railroad was in our hands. Enormous quantities of property were destroyed, and the intelligence fell like a knell of death upon the ears of General Lee that his last line of communication was in the hands of his foes, and that he must evacuate Petersburg and Richmond. Our bugles sounded the recall and we were to march back to the battle field and reform our lines. Slowly we retraced our steps, joyous over the great victory won, and sorrowful over the loss of our brave men. The battle field was reached and we encamped for the night. But we could not think of rest or sleep. The dead were to be buried. The wounded were to be cared for. I secured a short piece of candle, and a small spade, and with a comrade to assist we went in search of the bodies of Morrill and Gilmore. It was a lonely search. The hour of midnight, dark and damp. The silence was only broken by the groans of the wounded and the low conversation of the soldiers who were caring for them. After a long search in the darkness, carrying the lighted candle in my hand, our quest was rewarded by finding the looked for bodies. They lay as they had fallen. Morrill was shot through the body and had evidently lived a few moments. Gilmore had received two balls through his heart and of course had died instantly. Hickey had escaped with a slight injury. We dug two shallow graves under the shadow of a great oak tree and buried them side by side. We placed boards at their heads, telling their names, company and regiment and there left the remains of two men as brave and fearless as any who ever breathed the air of patriotism and liberty.

AN OLD PRIVATE.

A Virginian has just been relieved of a knife blade which he has carried in his body for the last eight years. Captain Phil Osmont of Stafford county was stabbed eight years ago by a fellow sailor, the knife blade breaking off in his body. He felt no inconvenience from the presence of this cold steel in his person after the wound healed till recently he felt it in his chest, just under his ribs. He then repaired to Fredericksburg, where a doctor, after examination, administered chloroform and extracted the blade, which was six inches long and one inch and a half in width. The captain was greatly relieved by the operation. This tough story is told by the Fredericksburg Star.

Young and middle-aged men, suffering from nervous debility and kindred affections, as loss of memory and hypochondria, should inclose three stamps to the World's Dispensary, 1100 Broadway, New York, for a copy of the World's Dispensary Medical Association Bulletin, N. Y.

Friendship Between Man and Woman.

BY ANNA B. McMAHAN.

Friendship is a word of varying import to different minds. To some, it stands merely for a calm good-will, a kindly sentiment toward associates. In the problem of life, it counts but as an insignificant factor. To others, the word has a far deeper and higher and holier meaning. It means, in their experience, attachment as warm and strong as life itself, enthusiasm of personal interest, trust unshaken through all things, faithfulness unto death. Whatever befalls, it is the solace, the light, the joy of life.

Nature large and comprehensive in sympathy, at once noble and tender, are the ones who know friendship in this perfection. Those who are themselves pure and lovely and refined are the quickest to discover and admire purity, loveliness, and refinement in others. George Sand has aptly said, "Anyone can love, but few have the capacity for friendship"; and we may add that the capacity is as admirable as it is rare. Love is sometimes born in a moment, without reflection, often with no real knowledge of its object, and no more sure foundation than a beautiful face, a pleasing manner, or graceful accomplishments. It may or may not be a blessing. Not so with friendship. It has its root in a close and intimate knowledge of the inner self of him whom we call friend, it grows because of a certain correspondence to that self in our own nature, it blooms in the atmosphere of heart attachment and mutual good offices. Its slowly perfected fruit is imperishable, and "blesses him that gives and him that takes."

Friendship triumphs over outward circumstances. Shared with chosen comrades, no surroundings can be utterly joyless and drear. Deprived of them, none can be wholly satisfying. It molds the inner life. A friend who comprehends us, mentally and morally, awakens in us powers unsuspected even by ourselves. It actually creates new powers, for the consciousness that even one true and loyal heart has faith in us, expects of us the best, inspires us to accomplish the best. Without such inspiration, much of the great work of the world would never have been done; and doubtless many a true spirit has gone through life starved and chilled, distrusting its own powers and failing of its highest achievement through lack of the sustenance and warmth of a generous friendship that it never found. De Tocqueville uttered the want of all noble souls when he said, "I cannot be happy or even calm without the encouragement and sympathy of some of my fellow-creatures."

Such being the nature and offices of friendship, there would seem to be every reason for its general enjoyment and cultivation. And yet many would limit its joys and privileges to relatives or persons of the same sex, and look upon it with a strange distrust as an independent relation between man and woman.

Especially is it urged that marriage should create a bar to all friendships between the sexes, that every man should find his wife, every woman in her husband, all the sympathy, help, and companionship necessary. Happily, this is sometimes possible. A marriage of minds, souls, interior lives, social interests and ends. Then the home idyl becomes the most perfect possible to mortals; but life means something more than this. Whoever would do something for his kind, whoever would move or lift up or strengthen or comfort his fellows, whoever would make the most of himself even, must not expend his sympathy in idyls however beautiful. He must have something large in his way of life. He must be quick to feel all the pleasures of human association, not the great ones only, but all. He must know not love alone, but all the emotions that enrich and adorn existence.

That there is a wide-spread prejudice against friendship between the unrelated of different sexes is indicated by the tone of explanation or apology with which biographers discuss historic examples. What is the reason? Why should anything so natural, so profitable, so ennobling as friendship ever excite doubt or suspicion? Do not these feelings spring from a mean and low estimate of humanity, from selfish and narrow views of life? A coarse and common nature feels the forms and shades of fine relation possible to delicate men and women. The calm and passionless, the disinterested and respectful affection of "soul friends," is not for him but for men of finer mold,—men like Sydney Smith exclaiming, "It is a great happiness to form a sincere friendship with a woman," or Auguste Comte saying, "The only true and firm friendship is that between man and woman, because it is only one free from all possible competition." Sneers and scoffing discredit the cavaliers, but nothing more.

In no other way can men and women be of such mutual help to each other as through an unselfish and generous friendship. In no other way do their natural differences more happily counterbalance and complement each other. Woman expects man to be brave,

wise, skillful, energetic, magnificent, and thus she helps him to be come so. She delights to sympathize in his struggles, to encourage his aspirations, to be proud of his achievements; and thus her friendship is ever his strength and cheer. Man seeks in woman purity and candor, loyalty, refinement, elevation, enthusiasm, tenderness: he does homage to these by a deferent and reverential manner, and thus his friendship is ever her grace and glory. Live otherwise unenviable and lacking in what the world counts blessings may know this charm.

There are women—very often neither young, beautiful, nor accomplished in any way—to whom one naturally turns for counsel in perplexity, cheer in despondency, sympathy in joy or sorrow, with good news or with bad, sooner than to those having a more definite claim. To them, one comes sure of not being misunderstood, sure of a listener, attentive, ready to look at the subject from a right point of view, and not anxious to interpose her own affairs at the wrong moment, sure of a kind, even need be, stern judgment, sure of discretion and secrecy in any confidence. These are the women who, married or unmarried, are fitted for friendship. If they be few, by so much the more should their quality be recognized as genius, and a genius quite as admirable as any other. Let a man, if he be worthy and so fortunate, rejoice in such a confidant and counselor, let him find in such intercourse both a stimulus and a rest, and let not the world look askance upon a relation so true and holy that it glorifies even the common details of life, and is the noblest form that friendship wears.

Happily, human nature has always been superior to insinuation, prejudice and evil-speaking. From St. Jerome and his pupil Pauls, from Michel Angelo and Vittoria Colonna, from Walter Scott and Miss Baillie, John Locke and Lady Masham, Cowper and Mrs. Unwin, Chateaubriand and Madame Recanati to Theodore Parker and Miss Frances Power Cobbe, or Emerson and Channing and Margaret Fuller, it is almost impossible to name an illustrious man who has not been appreciated, comforted, and inspired by some woman friend either before or after he became famous. The rude and untaught menial, whose thoughts soar not beyond the dull drudgery of his daily routine, may perchance dispense with friendship. Thinking minds, feeling hearts, striving souls, have ever found it a necessity of their being, so true is it that "the unobtainable difference between one man and another is that one feels more than another."—Christian Register.

A terrible scene occurred during a bull fight on a recent Sunday at Arles, in France. A man 60 years of age accidentally fell over the barricade into the arena and was at once pursued by one of the bulls. The poor old man could not run very fast, and in a few seconds the bull had tossed him high into the air, and letting him fall to the ground with a dull thud the furious animal gored him with his horns. An indescribable scene of excitement ensued. The bull was secured, and the man carried in a shocking state to the hospital. The Comtesse and the Sub-Prefect ordered the spectacle to be stopped; but this measure provoked such an outburst of protestation from the spectators that after an hour of free fighting and tumult the officials were actually compelled to order a resumption of the performance.

Be Sanible.
You have allowed your bowels to become habitually constipated, your liver has become torpid, the same thing will all your kidneys, and you are just dead. Now be sensible, get a package of Hays' Kidney and Bowel Pills, and you will find that you are not dead, but you will be a well man.—Albany Argus.

Ex-Queen Isabella of Spain is a brave woman. She weighs two hundred, is nearly sixty years old, and always was a fighter. At the Grand Prix at Longchamps the other day, she wore a sky-blue satin costume, with a bouquet to match trimmed with pearls.

Humbugged Again.
I saw so much said about the merits of Hop Bitters, and my wife who was always doctoring, and never well, tested me so urgently to get her some, I concluded to be humbugged again; and I am glad I did, for in less than two months' use of the Bitters, my wife was cured, and she has remained so for fifteen months since, and I feel such humbugging.—H. T. St. Paul.—Pioneer.

Excessive travel is said to be killing actors off faster than they have ever died before. The necessity of quick journeys renders them very liable to pneumonia and other dangerous complaints.

No Doctors Need Apply
To me to get their living. The only doctor I have is Sulphur Bitters. They cured me of Dyspepsia when the doctors all failed.—George Paige, Rochester.

Mr. Robert Bonner has paid \$382,000 for fast horses in his time. For Pocahontas he gave \$40,000, for Dexter \$35,000, and for Karus \$36,000.

SICK-HEADACHE.
Mrs. J. C. HENDERSON, of Cleveland, Ohio, writes: "The use of two of Pierce's Pleasant Purgative Pills, after a few weeks, has cured me of my chronic headache, and I formerly suffered terribly, as often, on an average, as once in ten days." Official druggists.

The aggregate ages of a couple married at Winchester, Ky., last week, amounted to 147 years. The groom is seventy-seven and the bride twenty.

THAT HUSBAND OF MINE
Is three times the man he was before he began using "Wells' Health Renewer." \$1. Druggists. Depot: Caswell, Hazard & Co.

The actor is never above his business.

VEGETINE
Who Can Deny the Facts?
The properties of Vegetine are so generally recognized that it is a certain and safe remedy in all the forms of this terrible and distressing disease, no matter upon what part of the body it is located. The most common assurance is given that it will, when taken regularly and persistently, cause any Cancerous tumor or Cancerous growth to disappear forever. Vegetine has been often tried; it has never failed nor will it ever fail to exterminate the last root of this disease on the person of any of its victims.

Vegetine is sold by all Druggists.

The Bad and Worthless
are never initiated or counterfeited. This is especially true of a family medicine, and it is positive proof that the remedy initiated is of the highest value. As soon as it had been tested and proved by the whole world that Hop Bitters was the purest, best and most valuable family medicine on earth, many imitations sprung up and began to steal the notices in which the press and people of the country had expressed their confidence in it, and in every way to induce infidelity to use their stuff instead, expecting to make money on the credit and good name of H. B. Many others started nostrums put up in similar style to H. B., with variously devised names in which the word "Hop" or "Hops" were used in a way to induce people to believe they were the same as Hop Bitters. All such pretended remedies are pure poison, no matter what their style or name is, and especially those with the word "Hop" or "Hops" in their name or in any way connected with them or their name, are imitations or counterfeits. Beware of them. Trust none of them. Use nothing but genuine Hop Bitters, with a bunch of green hops on the white label. Trust nothing else. Druggists and dealers are warned against dealing in imitations or counterfeits.

STARTLING DISCOVERY!
LOST MANHOOD RESTORED.
A victim of youthful indiscretion causing Premature Decay, Nervous Debility, Lost Manhood, &c., having tried in vain every known remedy, has discovered a simple and safe remedy, which he will send FREE to his fellow-sufferers, address J. H. REEVE, 45 Chatham St., N. Y.

The Newport Mercury.

John P. Blount, Editor and Proprietor.
SATURDAY, JUNE 24, 1882.

New Yorkers were sweating this week with the thermometer in the nineties.

Affairs in Russia are growing worse and worse, with no prospect of getting better.

The general appropriation bill, amounting to something over \$98,000,000, has passed the House of Representatives.

The House of Representatives has passed the River and Harbor bill, which appropriates some \$14,000,000, of which Newport Harbor gets \$20,000.

After many unsuccessful attempts, Miss Lelia J. Robinson, of Boston, has been admitted to the Suffolk bar. This is another victory for the women suffragists.

The Vermont Republicans have nominated the Hon. John L. Barlow, of Shelburne, for Governor. In Vermont the Republican nomination in sure election.

Mary Clemmer pertinently asks: "Could any amount of knowledge of an open Polar sea at the North Pole compensate Mrs. De Long to-day for what she has lost?"

America is promised an opportunity to gaze upon the lovely face of Mrs. Langtry, the English professional beauty. She will be in this country in October.

Rigorous examinations await the candidates at Annapolis for admission as cadet midshipmen. Of 30 official candidates only 11 were admitted. Twelve failed in the physical examination, and the others in the scholastic.

The Congressional Year Book for 1882 shows that the number of churches in 1881 was 8804, and the total membership was 881,897, a gain of 69 churches, but a decrease of 2,035 members, as compared with 1880. It is one of the mysteries of the religious world that Congregationalism is not keeping pace with the other denominations.

The Arctic Wanderers.

The crew of the Arctic search steamer Rodgers has been rescued from the bleak Siberian shore, where they landed on escaping from the burning vessel. Letters had been left at Plover and Marcus bays with the natives, to hand to any visiting whaler. Capt. Owens, of the steam whaler North Star, of New Bedford, got one of the letters. He forced his ship through the ice opposite St. Lawrence bay, and reached there May 8. On the afternoon of May 14 all the party got safely on board. The commandant of the party before leaving gave to the natives, who had so kindly befriended them, all the trade goods, rifles, ammunition and boats. This assures a kindly reception for any other party of shipwrecked mariners that may come to them for aid. The U. S. revenue cutter Corwin, which sailed in search of the Rodgers party, hove in sight at the North Sea was leaving port, and the men were transferred to the Corwin, which reached Port Townsend, Puget's Sound on Tuesday, on the way to San Francisco.

The details of the burning of the Rodgers are extremely interesting. The steamer was a mile and a half from shore. The fire gained so rapidly that efforts to save the vessel were abandoned. An attempt was made to secure provisions, but with only partial success.

After encamping for two days on the beach, the party went to the natives' village of eleven huts, seven miles distant, and officers and crew were distributed among different inhabitants where they settled down for a long winter's sleep, adapting themselves to the customs of savage life. It soon became evident that the supply of walrus' meat of the natives was insufficient for such a large party, and a redistribution of the men became necessary among the different villages along the coast which was done within the range of about thirty-five miles. On the 4th of February Master C. F. Putnam, commanding the supply depot at Cape Serdige, Karmen, arrived at the village with four sledges loaded with pemmican and other provisions for the shipwrecked party, he having heard of the loss of the ship through the natives. He started on his return to the depot in bad weather and was overtaken by a terrible gale. About twelve miles from North Head he was carried off to sea on an ice floe. Later in the day he was seen about seven miles off shore abreast of the village. A vigorous attempt was made to rescue him by four of the Rodgers' crew and two natives in a canoe, but they were unable to reach him and were obliged to put back. This was the last ever seen of Putnam. The conduct of the natives was excellent, and their humble hospitality profuse. Their provisions of walrus and seal were at times scarce, and they often went without food themselves to afford food for the whites. The Rodgers party subsisted entirely upon native food.

These ends another Arctic expedition. This relief party for the Jeannette failed, and in turn had to be looked up. Isn't it time to give up this business?

The Sprague Estate.

The Providence Journal says: A meeting of Sprague creditors, in response to a call signed by Messrs. Kimball, Spencer and Hawes, was held in State Hall, Thursday. The Hall was well filled, but few if any of the principal creditors were present. Trustee Chaffee and Gen. Butler were both absent. Mr. Orrin S. Spencer called the meeting to order, and Mr. Wm. G. R. Mowry presided. A resolution, approving the plan set forth in an assigned proposition to convey the trust estates to the Quinbeck Company received a vote of 13 in favor and 3 in opposition, and was declared carried. A committee was appointed to solicit signatures of creditors, and before the people left the hall two names had been appended to the resolution, representing claims amounting to \$825. The meeting was tolerably harmonious, but its influence in settling the obligations of the Sprague mortgage notes can scarcely be underestimated. The meeting appointed as directors to manage the property under the above resolution, Hon. Benedict Lapham, Hon. B. F. Butler, C. H. George, Wm. G. R. Mowry and William F. Styles.

Mr. Conkling is credited with having given a political friend the following advice: "First," said he, "get all the advice and opinions you can; then digest them; devote the best energies of your mind to arrive at a decision as to what is absolutely the best policy to pursue; then, after having thoughtfully and conscientiously arrived at this decision, do exactly the opposite, and you cannot fail to succeed in politics."

The latest bit of political gossip for New York is to the effect that Cornell and Conkling have put their heads together and have arranged a delightful little plan, for the denizens of that State during the next political year. The plan proposes, Cornell for Governor, Senator Lapham for Lieut. Governor; the Senator then to resign and Cornell to appoint Conkling to fill out Lapham's unexpired term in the Senate.

President Arthur has completed the Tariff Commission by choosing Gen. Wm. H. McMahon, of New York, and Alexander R. Boteler, of West Virginia. Mr. Boteler is taken because he is a Democrat, and Gen. McMahon because he has had seventeen years' experience in the New York custom-house and is an expert in tariff matters.

Mumfries papers say that the recent warm weather has had a marvelous effect on the cotton crop, and planters are hopeful of a good yield. The grain crops of Tennessee will be a surprise to the great West this year. Corn and clover are doing well in all parts of the State, and rye, oats and barley will be an advance on previous years.

The U. S. Senate, Thursday, passed the national bank act, as reported from the committee on Finance. This bill has already passed the House, but the bill having been amended in the Finance committee of the Senate will now go back to the House for concurrence. The vote in the Senate by which the bill was passed stood 34 to 13.

The American Institute of Instruction and the National Educational Association will hold a joint meeting at Saratoga four days beginning Tuesday, July 11. Special rates are offered for teachers. The secretary of the former society is Geo. A. Littlefield, of Boston, who will furnish all needed information.

The U. S. Senate has already amended the River and Harbor bill by adding several millions thereto, and it is thought that the appropriations will be at least twenty millions dollars by the time the bill gets through the Senate.

Ex-Gov. Robinson of New York has the grim pleasure of reading his own obituary, several papers have made a mistake in regard to the identity of Lucius Robinson of Vermont, who died a few days ago.

The Senate has passed a bill providing for the enlargement of the White House, and an effort is making to sell a site for a Congressional Library building for one million dollars.

The returns of the election for members of the Dominion parliament now stand: Ministerial 93; opposition, 52. This is an opposition gain.

The Republican majority for Congressman in Oregon is over 3000; the majority on joint ballot in the Legislature is placed at 17.

Mrs. Vanderbilt has secured the cook who formerly worked for the Baroness de Rothschild, and pays her \$7000 a year.

More lives and property have been lost on the Newfoundland banks this year by icebergs than for many years past.

The grave of Emerson at Concord, Mass., is kept covered with fresh flowers by the young people of the town.

By the fall of a burning cotton waste mill at Boston on Saturday, a score of firemen were burnt.

The catch of eel in the waters of Connecticut was much smaller this year than usual.

Black Island Freeman.

The Providence Journal, in the course of a rigorous review of Mr. Edwin Metcalf's recent address on suffrage in Rhode Island, propounds the following queries: Where, then, are we most likely, according to all experience, to find that political virtue and intelligence not only essential, but absolutely indispensable to good government in a Republic? Theoretically speaking, one would say, among those owning and tilling the soil, the natives and the owners of the State; those who sustain it by the taxes they pay and who are affected the most directly and seriously by every law that is passed, and by every change in the quality of population. Would Mr. Metcalf relegate us to the rule of Boss Tweed and the foreign element, to the suppression of the "small farmers" who have given Rhode Island her distinctive and honorable character, and who are to-day the "backbone" of a civilization as progressive as it is conservative, and which has made in its own sphere, and in a large part, the smallest State in the Union the synonym for all that is desirable in education, all that is profitable in business, all that is glorious in freedom of thought and all that is promising in regulated liberty? Did Mr. Metcalf say what he is said to have said; and if so, does he really mean it?

Mr. Labouchere makes bold to say in London Truth that the managers or manipulators of the electric light companies are more bent on gulling simple-minded investors than in putting their inventions on a practical commercial basis, and the statement ought to make those on this side of the Atlantic who are applied to for subscriptions to the capital of any of the companies to be careful of what they are doing.

At the New York Yearly Meeting of Friends, the answers to the sixth query concerning the testimony against a hiring ministry gave evidence that the Friends are relaxing their opposition to this practice. The meeting consists of 503 families and 2381 members.

"Have you had your ears pierced?" asked a young lady of her chum, who lived next door. "I should think so," was the crushing reply, "hearing you sing every day." There is now a great gulf of coldness between the two.

The Mechanics' National bank, of Newark, N. J., which failed last year through a defalcation of \$2,500,000 by Cashier Baldwin, is to be reorganized with a capital of \$300,000, with ex-Congressman G. A. Halsey, as president.

James H. Ring, an old actor, who played for many years in the Boston Museum, and acquired considerable celebrity for his elaborately careful performance of small parts, died at Manchester, N.H., Monday.

The bill for appropriating \$50,000 for the fishery exhibition in London will be considered in the House soon; also the one granting \$1,000,000 for the congressional library. Both will probably pass.

Propping up peach trees to prevent them from breaking down under the weight of fruit is the news from all parts of North Carolina. Equally flattering accounts come from Delaware and New Jersey.

An appeal has been issued for aid for the sufferers from the Iowa cyclone. Property worth \$3,000,000 has been destroyed, and 1,500 people are homeless.

Admiral Worden, of Monitor fame, has been quite sick at Washington, but is now convalescent, and is at Quaker Hill, Dutchess County, N. Y.

The Washington monument is now 270 feet high. This is a few feet over one half the intended height. The work is going on steadily.

The whaling bark Sappho, of New Bedford, has been crushed in Arctic ice. The crew were saved by other whalers present.

David Thomas, who has been identified with the birth and progress of the iron industry of America, is dead.

John Bright will complete his twenty-fifth year of Parliamentary service this summer.

President Arthur was present at the grand army encampment at Baltimore this week.

Lightning is making mischief again with the oil tanks in western Pennsylvania.

BARNUM AND JUMBO.

At Newport, Tuesday, June 27. Barnum's great and notable show will appear in Newport on Tuesday next, June 27. We repeat the date, although no doubt every man, woman and child on the Island of Aquidneck know it already. From many enthusiastically commendatory newspaper comments, we select the following from the Newark (N. J.) Register:

So general was the interest that some factories and schools closed entirely, while others were simply attended. The parade was a gorgeous pageant of wagons, resplendent with gold and mirrors, which reflected the delighted countenances of the multitudes, dens of lions, leopards, tigers and other rare beasts, triumphal cars, band chariots, men and women on horseback, and a hundred other curiosities. In the centre of the menagerie there stood Jumbo towering above his score of companions, and as a natural sequence was the one object of observation. He appeared not to have suffered any from his jaunt around the country, and received in his trunk all the little dainties offered him by the visitors. Near him stood the baby elephant just sixteen weeks old, which was as frisky as a kitten, and already will answer the voice of the keeper.

The greatest attractions at first announced were Jumbo and the baby elephant, but when it was subsequently stated that the great, the only P. T. Barnum was present in person, hundreds decided to go who at first had remained undecided, and fully 30,000 people assembled under the canvases.

New Arrivals.

Jumbo is Coming!
AND ALL THAT HAVE DELAYED BUYING
STRAW HATS!
HAD BETTER
HURRY UP,
FOR YOU WANT TO
Appear in Style!
ON THE
GLORIOUS 27th.
I HAVE A
Large Stock of Straw Goods
THAN
ANY THREE DEALERS TOWN.
AND AM SELLING THEM
CHEAPER, TOO!

You can see a variety of straw hats from 10 cents to \$4, and every good style and shape in the market. You might as well look for hats and shoes in a dry goods store as for hats and fashionable goods in a clothing store.

I am selling an excellent straw hat for boys, in white, brown and mixed, for 60 cents, and a tip-top hat for men for 75 cents. I am also selling a Derby straw hat for \$1.25, that one alleged "hatter" asks \$2.00.

I have just received a line of French BALBRIGGAN UNDERWEAR, very fine. A lot of fancy and black cloaked, Lisle thread hosiery. White duck hats and caps. New fancy bordered handkerchiefs. The "Silocco", the popular shape in puff scarfs. Six different patterns in coachmen's flat scarfs in white. Boys' faced front shirts in five colors. Men's and boys' bathing, lacrosse, bicycle and lawn tennis hats and shirts. Sun umbrellas, silk umbrellas, in green, brown and black. Hammered gold and silver headed canes. Saranac driving gloves, gent's Lisle thread and dog skin gloves. Fancy night shirts. The largest line of

FANCY SHIRTS,
with collars attached, ever shown in Newport. Hammocks, awnings, bicycles and tricycles, in fact, everything to be found in any first-class hat and furnishing house in the country. I buy for cash and sell for cash, too, every time, and when you want to buy hats or men's furnishings, go to the "hatter's quarters."

72 1-2 THAMES STREET.

Laundry work will be sent in future twice a week—Mondays and Thursdays, and returned Thursdays and Saturdays.

AYER'S CATHARTIC PILLS,
For all the Purposes of a
Family Physic,
CURING
Constipation, Jaundice,
Dyspepsia, Indigestion,
Biliousness, Piles, Stomach-
ache, Headache, Neuralgia,
Rheumatism, Eruptions,
and Skin Diseases, Bilious-
ness, Liver Complaint, Dropsy, Tetter,
Rheum, Itch, Gout, Neu-
ralgia, as a Dinner
Pill, and Purifying the
blood, are the most congenial purgative yet per-
fected. Their effects abundantly show how
much they excel all other Pills. They are safe
and pleasant to take, and powerful to cure.
They purge out the foul humors of the blood,
they stimulate the sluggish and disordered or-
gans into action, and they impart health and tone to
the whole being. They cure not only the every
day complaints of everybody, but formidable
and dangerous diseases. Most skillful phys-
icians, most eminent clergymen, and our best
citizens, send certificates of cures performed
and of great benefits derived from these Pills.
They are the safest and best physic for children,
because mild as well as effective. Being sugar
coated, they are easy to take, and being purely
vegetable, they are entirely harmless.

and principal points in Rhode Island from this
office, via Earle & Prow's Express.

Fun for the Girls.
THE
American Tricycle
The Tricycle is manufactured in four sizes,
distinguished by the diameter of the wheels on
each. The following are the cash prices:
No. 1, 16-inch wheels, for children, \$4.00
No. 2, 20-inch wheels, for children, 10.00
No. 3, 26-inch wheels, for children, 12.00
No. 4, 32-inch wheels, for adults, 14.00
Every Tricycle is made of the best and strongest
material, and is so constructed as to be easily
and safely steered. They are also beautifully
painted and varnished, with best carriage finish,
being designed for service as well as beauty.

THE GLORY OF A MAN IS IN
HIS STRENGTH.
Physical Force when Lost Quick-
ly Regained by Consulting
Dr. C. J. Lewis,
WHO, after intense study and deep re-
search, has lately discovered a new, ex-
traordinary, quick, certain and inexpensive
cure for diseases of the Brain and Spinal
Cord, Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. THIS
NEW AND MARVELLOUS MEDICAL PREP-
ARATION has cured the most desperate forms
of Nervous disorders in both young and old.
It has been used by the most eminent physi-
cians, and its efficacy is attested by the most
valuable testimonials. It is a most valuable
cure in all cases of Nervous debility, and in
all cases of Rheumatism, Sciatica, Neuralgia,
Headache, Impotency, and Deranged Functions
of the Nervous and Generative Systems. It is
a most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of the Nervous and Gen-
erative Systems. It is a most valuable cure
in all cases of Nervous debility, and in all
cases of Rheumatism, Sciatica, Neuralgia, Head-
ache, Impotency, and Deranged Functions of
the Nervous and Generative Systems. It is a
most valuable cure in all cases of Nervous
debility, and in all cases of Rheumatism, Sci-
atica, Neuralgia, Headache, Impotency, and
Deranged Functions of

NEW ENGLAND ITEMS.

BROOKLYN.

The Bethel M. E. Church Providence, was kept closed Sunday by vote of the church, to prevent the newly-appointed pastor, Rev. W. H. Yeocum, from occupying the pulpit. Mr. Yeocum therefore preached twice from the church steps, but his words fell on very stony ground, although his audience embraced some of the members of the church. The cause of the trouble among the colored brethren is not very plain, but so far no sufficient reason appears for the treatment of Mr. Yeocum. It is understood that his Bishop instructs him to "stick."

Paul E. Taylor, the only remaining son of the Rev. E. G. Taylor, D. D., recently of Providence, died at his father's residence in New York on the morning of the 20th inst., after suffering one week. He was expected to graduate Wednesday from Rochester University. In their double affliction, a younger son having died a few weeks ago, the parents have the deepest sympathy of their many friends in this State.

At a meeting of the corporation of Brown University, Thursday, the resignation of Marshall Woods, Esq., treasurer for sixteen years, was accepted, with resolutions recognizing his fidelity and efficiency. Rev. Eliza Benjamin Andrews, class of 1870, was elected to the Professorship formerly filled by the lamented Prof. Diman. Prof. Parsons having resigned, Dr. C. V. Chapin, was appointed instructor in Physiology for the ensuing year.

When the River and Harbor bill was under consideration in the House of Representatives on Saturday last, Mr. Spooner, of this State, moved an amendment appropriating \$10,000 for "improving basin and government wharf at Block Island R. I." The amendment was lost although supported by Mr. Spooner with an able speech.

Hon. Alfred Anthony, of Johnston, for many years one of the leading men in the Democratic party in this State died at his residence in Olneyville, Thursday, aged 78 years. Mr. Anthony represented his town in the General Assembly for many years.

J. M. E. Stone, Esq., of North Providence, the newly-appointed commissioner of dams and reservoirs, has been seriously ill of pneumonia, but, we are glad to learn, is now convalescent, and will doubtless soon be able to resume his duties.

The banking firm of Wilbour, Jackson & Co., Providence, which failed to keep its agreement to bid \$2,880,000 on the Sprague estate, has been forced for contempt by the supreme court, to the extent of \$7,500.

Hon. Jonathan Chase, member of Congress from the second district in Rhode Island, and Judge LeBaron B. Colt, of Bristol, received the honorary degree of Master of Arts at the Commencement of Brown University.

In the eighth race at the Boston regatta Saturday, the Narragansett, of Providence, were twenty-nine seconds behind the Harvards, neither crew making remarkable time, because of rough water.

The Commencement day exercises at Brown University were carried out as usual. Among the honorary degrees conferred were LL. D. upon Geo. William Curtis and Judge Horace Gray.

The President has sent to the Senate the nomination of Wm. H. Parkhurst, of Rhode Island, as Indian Agent at the Crow Creek and Lower Blue agency, Dakota.

The examination at the State Normal School will take place on Thursday, June 29, and the graduating exercises will be held the next day.

Herbert F. Bennett, recently elected Town Clerk of Bristol, has resigned his seat in the General Assembly, and a new election has been ordered.

Henry Martin, a seaman, fell from the schooner D. M. Anthony, and was drowned, while the vessel was off Wickford, Saturday.

On a recent Sunday Hon. Rowland Hazard occupied the pulpit of the Peace Dale Congregational church, the pastor being sick.

Lizzie Fleming, a girl of fifteen years, was drowned Tuesday afternoon, while bathing in the Blackstone river at Pawtucket.

MASSACHUSETTS.

Dr. Jarvis Gay, of Norwood, was shot dead by Geo. Simmons, the other night, the latter mistaking the doctor for a burglar.

VERMONT.

John Lord, an esteemed citizen of Norwich, died Monday. Had he lived until August 1, he would have been 100 years old. He retained his faculties to a remarkable degree till a few days before his death.

A cyclone of wind and rain passed over South Royalton, Vt., Monday, doing much damage, unroofing houses and barns, and leveling large trees, fences, etc.

MAINE.

The Bangor, Me., greenback district convention nominated Congressman George W. Ladd after a sharp struggle.

CONNECTICUT.

The Eagle knitting mills in Glastonbury, were burned Wednesday, involving a loss of \$100,000. Three children were burned, one fatally.

C. W. Faller, General Director of Barnum's great London United Shows, was in town Thursday, with his wife. He was shown the sights of the fair place by Mr. S. S. Vane.

A Word of Commendation.

[From the Narragansett Weekly, Westerly.]

The Newport Mercury began its one hundred and twenty-fifth year of publication with a new and improved paper, and a new and improved staff. It is a lively, good-grained, and a very good paper.

NEWPORT'S COTTAGERS.

The Summer Residents for 1882.
